

Streamline ERP migration and RISE with SAP and Microsoft

Experience a seamless and secure transition on your terms

SAP and Microsoft have been partners and mutual customers for years. Through these years of collaboration, we've developed a partnership for Business Transformation-as-a-Service, built on future-forward solutions prioritizing security, usability, and ease of migration. So, upgrading your SAP ERP to SAP S/4HANA opens limitless opportunities to accelerate business innovation.

Benefits of RISE with SAP on the Microsoft Cloud

| | | |
|---|--|--|
|  <p>Trusted partnership</p> |  <p>Industry-leading AI technology</p> |  <p>Infrastructure management and cost savings</p> |
|  <p>Enhanced security</p> |  <p>Real-time business insights</p> |  <p>Faster time to value</p> |

Trust Microsoft with your SAP migration

With a 30+ year partnership to support your migration, Microsoft is the preferred cloud platform for RISE with SAP.

Offering 60+ SAP BTP services and the broadest set of connectors and APIs, Azure helps businesses accelerate innovation and integration in the cloud—without sacrificing security, performance, or reliability.

100+

compliance certifications, the largest compliance portfolio of any cloud platform

≤75%

increased end user productivity for specific tasks¹

\$6.3M

per year saved by migrating SAP to the Microsoft Cloud¹

118%

ROI after three years³

Hilti

“From a timing perspective, SAP offering RISE with SAP as a program where Microsoft was on board was a lucky coincidence. We wouldn't have moved as fast or been as happy if it was another cloud services provider we didn't know.”

Dr. Andreas Weiner, RISE Program Manager and Head of Strategic IT Projects, Hilti

Secure your migration (and beyond)

Boost your security posture and ensure business continuity during and after migration with multilayered cloud security solutions.

Enable continuous monitoring of your SAP systems to detect threats, automate threat responses, and protect identities using single sign-on and multifactor authentication for SAP and non-SAP apps.

72%

reduced likelihood of a breach²

50%

increased IT and security team efficiency²

\$5.2M

saved in reduced breaches over three years³

25%

reduced security license costs from vendor consolidation²

Drive productivity and efficiency

Microsoft offers the most comprehensive cloud platform for SAP integrations. It combines industry-leading applications and cloud technology with decades of experience in developing solutions for virtually every business vertical.

Increase employee productivity by integrating Microsoft 365 and Copilot for M365 with SAP solutions.

Eliminate manual tasks using SAP connectors in the Microsoft Copilot Studio to build your own copilot experiences.

Improve SAP developer efficiency and enable fast innovation using GitHub Copilot.

Automate business processes by integrating SAP BTP with low-code solutions by Microsoft and Copilot for Power Platform.

 **25%** improvement in developing new applications and in fixing issues with SAP on the Microsoft Cloud¹

Use cloud-scale analytics to transform data into real-time intelligence

Extract rich insights from your data with AI-powered cloud-scale analytics. With intuitive data visualization tools, reporting services, and unified governance in the cloud, you can power business decisions and ensure data integrity for your SAP and non-SAP data.

\$0.5M–\$1.2M

gained due to better insights³

≤\$1M

saved in security, governance, and compliance costs³

\$1.6M

gained in increased business analyst productivity³

Atos

“We chose Azure to increase flexibility and scalability, with a system we can adjust as required. In addition, we have easier interoperation with the services on offer, like Teams and Power BI, and technologies like AI, machine learning, and chatbots.”

Frédéric Aubrière, Group CIO, Atos
