

A Day in the Smart Workplace

Today, employees expect a workspace that engages them in productive work wherever they are.

of employees want flexible and remote work options

but two-thirds say they need more in-person work and collaboration.¹

In a smart workplace, people can work in entirely new ways with new tools, creating and engaging from anywhere—securely. Meetings and calls feel natural, collaboration is easy, and people are more productive than ever before.

Employees can access, create, and share content from any device and location.

Having a single secure, accessible platform for everything from meetings to calls to content creation lets employees get their work done wherever they are, without switching from app to app.

Bi-weekly Collaboration

Whether working from the office or a coffee shop, communication and collaboration are easy and intuitive.

Employees can share information, set up calls, and collaborate with anyone in their organization quickly and easily on a consolidated platform.

Virtual meetings often leave people feeling left behind

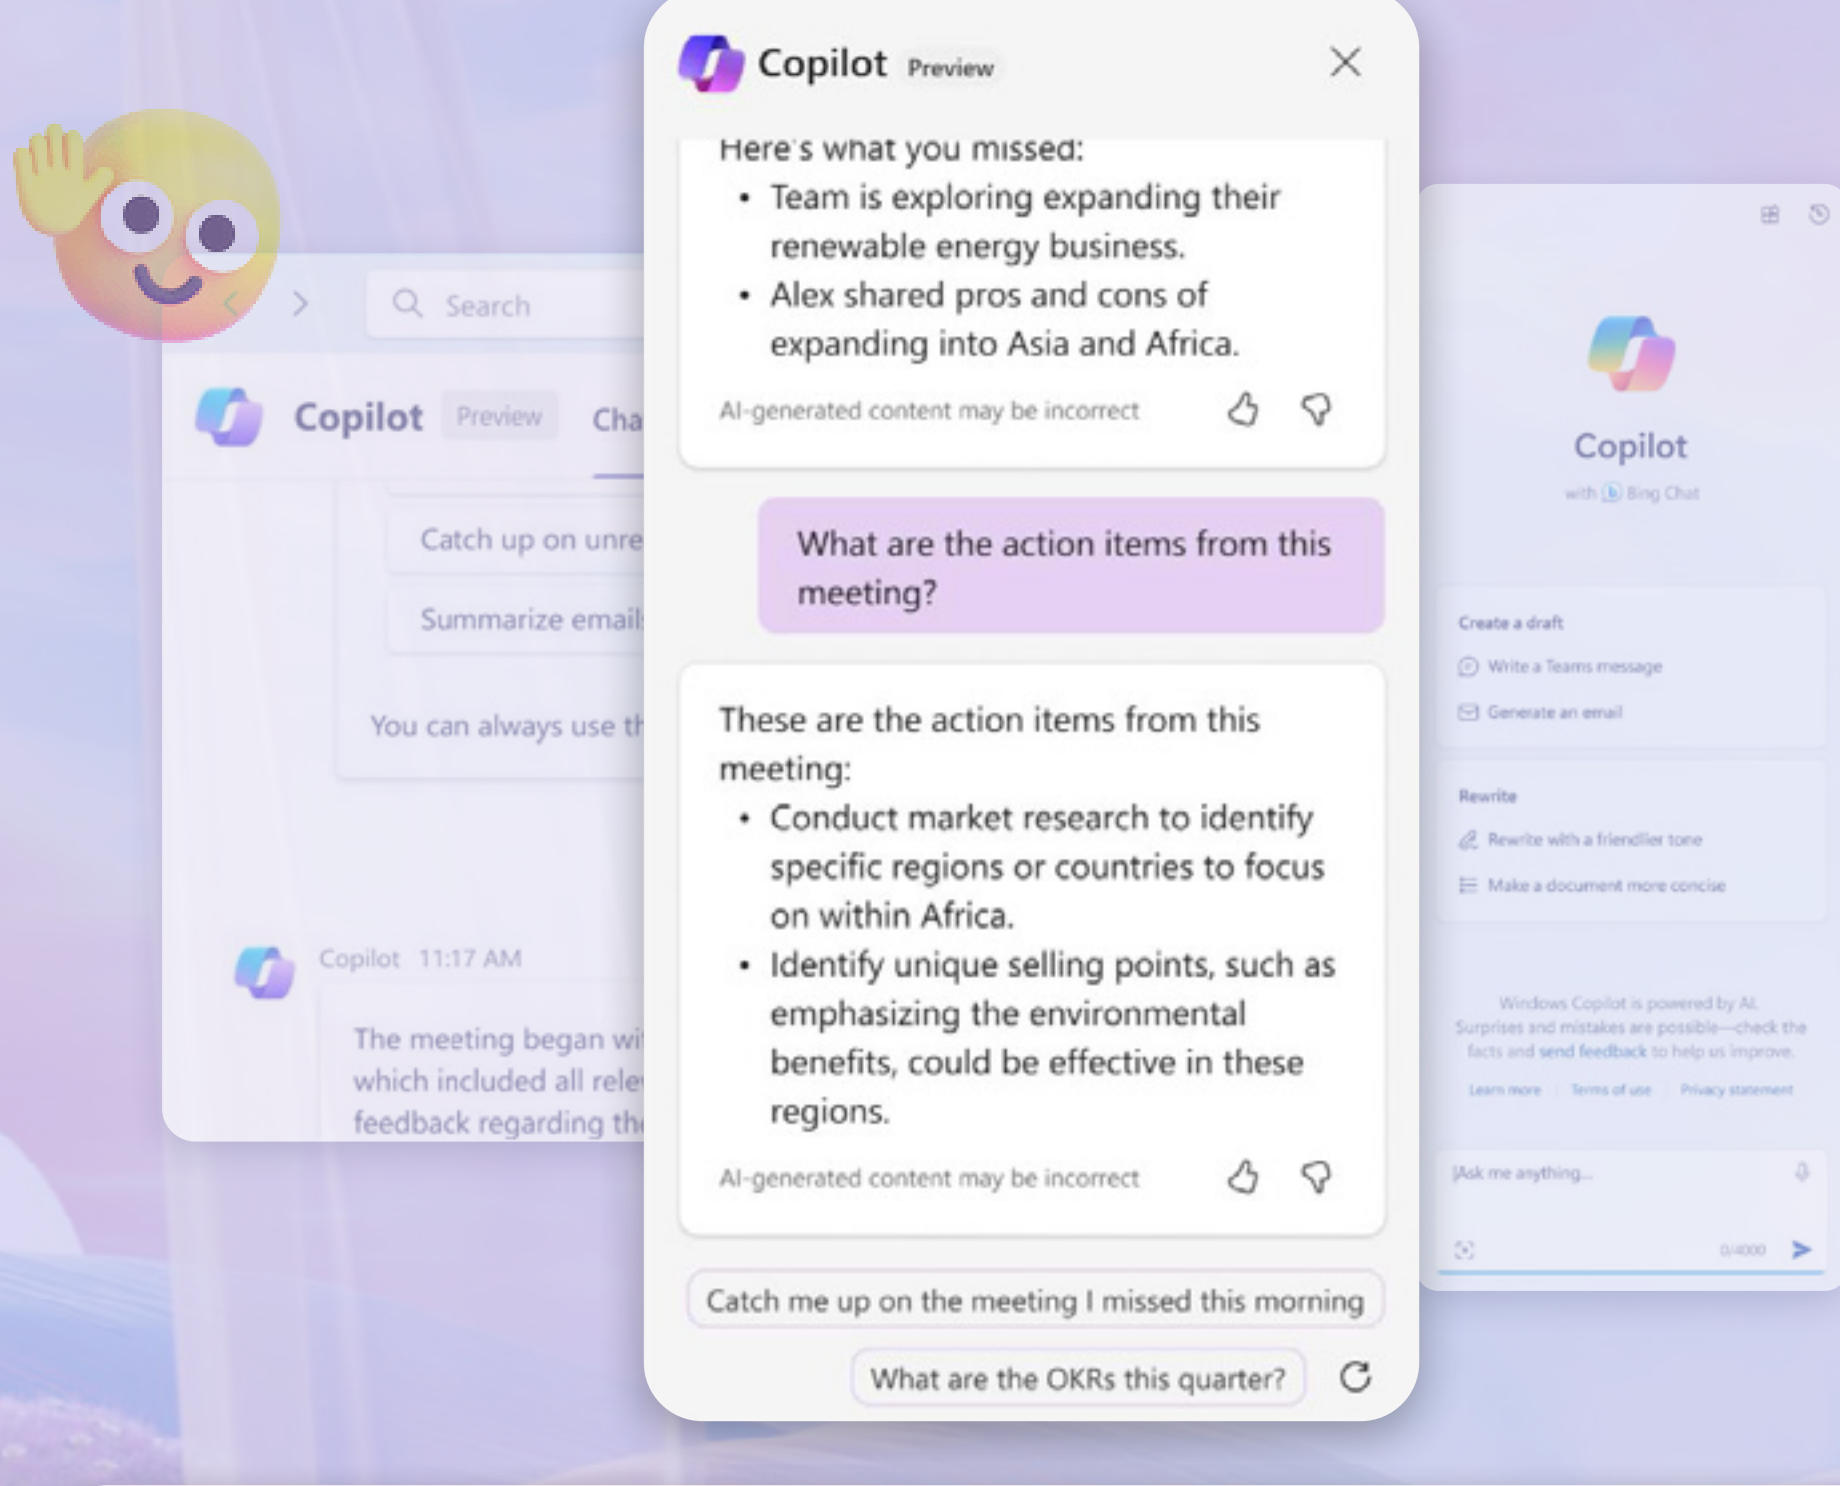

of people struggle to catch up on meetings they join late²

of people report next steps are unclear at the end of a meeting²

In a smart workplace, AI-powered meetings allow for easy collaboration and clarity on next steps

Recaps, highlights, and notes let employees quickly catch up and clearly understand next steps. Immersive meetings connect employees to their colleagues and customers with virtual whiteboarding and intelligent content capture.

Employees can seamlessly move calls between devices for secure, uninterrupted work on the go.

Call transfer lets employees move between workspaces and devices without interruption, while call recording and transcription lets them focus on the moment and revisit a conversation later for clarity. Advanced security controls help employees filter through the noise of spam and fraud calls.

Thanks to intelligent, flexible features, employees can join the conversation without distractions.

Voice isolation, closed captions, background blur, and flexible video layouts help everyone feel comfortable engaging regardless of where or how they connect.

Create a smart workplace with Microsoft Teams for enterprise.
